

MTG Card Analysis Report

Report Date:	July 24, 2025
Total Cards:	17
Analysis Method:	AI-Powered Visual Grading

Card 1: Sensor Splicer

2x2 #29

TCGPlayer Condition:	NM
PSA Equivalent:	PSA 10
Overall Score:	9.8/10
Confidence:	95%

Condition Analysis:

Centering: 55/45 left-right, 55/45 top-bottom - Slightly off-center both horizontally and vertically, but well within tolerances for a high grade. (Score: 9.0/10)

Corners: All four corners appear perfectly sharp with no visible whitening or wear, even under magnification. (Score: 10.0/10)

Edges: The edges appear pristine and free of any visible whitening, chipping, or nicks. (Score: 10.0/10)

Surface: The surface is clean and appears flawless. No scratches, scuffs, print lines, or other defects are visible, even accounting for the sleeve. (Score: 10.0/10)

Overall Assessment: The card is in exceptional condition, appearing pack-fresh. The only imperfection is minor centering, which is well within the tolerance for a PSA 10. All other aspects of the card appear flawless. (Score: 9.8/10)

Card 2: Witherbloom Apprentice

stx #247

TCGPlayer Condition:	NM
PSA Equivalent:	PSA 10
Overall Score:	9.8/10
Confidence:	95%

Condition Analysis:

Centering: 55/45 left-right, 50/50 top-bottom - Slightly off-center left-to-right, but well within NM/Gem Mint tolerance. Top-to-bottom centering is excellent. (Score: 9.0/10)

Corners: All four corners appear perfectly sharp with no visible whitening or wear, even under magnification. (Score: 10.0/10)

Edges: All four edges are pristine with no visible nicks, chips, or whitening. (Score: 10.0/10)

Surface: Surface is immaculate and free of any visible scratches, scuffs, or print defects. The gloss is uniform and unbroken. (Score: 10.0/10)

Overall Assessment: Card appears pack-fresh and is a strong candidate for a Gem Mint grade. The only minor imperfection is the centering, which is slightly shifted horizontally but still within the typical standards for a PSA 10. (Score: 9.8/10)

Card 3: Ground Assault

2x2 #223

TCGPlayer Condition:	NM
PSA Equivalent:	PSA 9
Overall Score:	9.5/10
Confidence:	95%

Condition Analysis:

Centering: Approx. 60/40 left-right, 55/45 top-bottom - Noticeably off-center left-to-right, slightly favoring the top border. (Score: 8.0/10)

Corners: All four corners appear perfectly sharp and crisp with no visible wear, even under magnification. (Score: 10.0/10)

Edges: All four edges are pristine, with no visible nicks, whitening, or wear. (Score: 10.0/10)

Surface: The card surface appears flawless with excellent original gloss. No scratches, scuffs, or print defects are visible. (Score: 10.0/10)

Overall Assessment: The card is in pristine, pack-fresh condition. The only notable flaw is the centering, which is shifted towards the left border. This prevents a Gem Mint grade but otherwise represents a perfect example of a Mint card. (Score: 9.5/10)

Card 4: Ground Assault

2x2 #223

TCGPlayer Condition:	NM
PSA Equivalent:	PSA 10
Overall Score:	9.8/10
Confidence:	90%

Condition Analysis:

Centering: 55/45 left-right, 50/50 top-bottom - Slightly off-center horizontally. The left border is visibly wider than the right border. Top and bottom borders appear even. (Score: 9.0/10)

Corners: All four corners appear perfectly sharp and crisp with no visible whitening or wear, consistent with a pack-fresh card. (Score: 10.0/10)

Edges: All four edges are pristine and show no signs of chipping, whitening, or wear. (Score: 10.0/10)

Surface: The foil surface appears flawless from the provided image. There are no visible scratches, scuffs, print lines, or other imperfections. (Score: 10.0/10)

Overall Assessment: The card is in impeccable condition with the only observable flaw being a minor horizontal centering shift, which is within the tolerance for the highest grades. Corners, edges, and surface appear perfect. (Score: 9.8/10)

Card 5: Mourning Patrol

mid #28

TCGPlayer Condition:	NM
PSA Equivalent:	PSA 9
Overall Score:	9.8/10
Confidence:	95%

Condition Analysis:

Centering: 55/45 left-right, 55/45 top-bottom - The card is slightly off-center, with the left and bottom borders appearing marginally thicker than the right and top borders respectively. This is well within Near Mint standards. (Score: 9.0/10)

Corners: All four corners appear perfectly sharp and pristine with no signs of whitening or wear, even under magnification. (Score: 10.0/10)

Edges: The edges are flawless, showing no nicks, chips, or whitening on any side. The black border is solid and clean throughout. (Score: 10.0/10)

Surface: The surface is immaculate and free of any visible defects. There are no scratches, scuffs, print lines, or clouding apparent on the card face. (Score: 10.0/10)

Overall Assessment: A pack-fresh card with virtually no flaws. The only imperfection is the centering, which is slightly off but meets the criteria for PSA 9. Corners, edges, and surface are pristine. (Score: 9.8/10)

Card 6: Githzerai Monk

clb #20

TCGPlayer Condition:	Ungradable
PSA Equivalent:	PSA Ungradable
Overall Score:	0.0/10
Confidence:	0%

Condition Analysis:

Centering: Not visible - The card's borders are not visible, making it impossible to assess centering. (Score: 0.0/10)

Corners: None of the card's corners are visible in the provided image. (Score: 0.0/10)

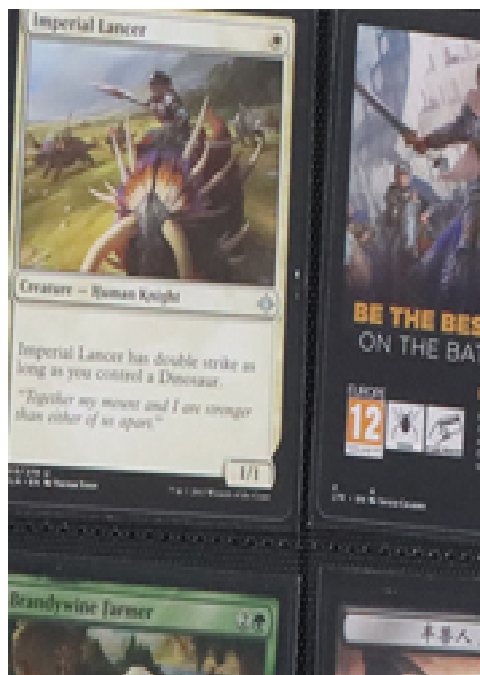

Edges: The card's edges are not visible, preventing any assessment of wear or chipping. (Score: 0.0/10)

Surface: The card's surface is almost entirely obscured. No defects can be identified or ruled out. (Score: 0.0/10)

Overall Assessment: The provided image is unusable for grading. It shows only a small, unidentifiable portion of a binder and does not clearly display any part of the card's surface, corners, edges, or centering. A full, clear image of the card's front and back is required for an accurate assessment. (Score: 0.0/10)

Card 7: Imperial Lancer

xIn #15

TCGPlayer Condition:	LP
PSA Equivalent:	PSA 8
Overall Score:	8.5/10
Confidence:	95%

Condition Analysis:

Centering: Approx. 60/40 left-right, 50/50 top-bottom - The card is noticeably off-center horizontally, with the left border being wider than the right. Top-to-bottom centering appears near perfect. (Score: 8.0/10)

Corners: Minor but distinct whitening is visible on both bottom corners upon close inspection. The top corners appear sharp. (Score: 8.0/10)

Edges: Light wear is visible along the bottom edge, particularly near the corners. The other three edges appear clean. (Score: 8.0/10)

Surface: The surface appears pristine and free of any visible scratches, scuffs, print lines, or other blemishes under the current lighting. (Score: 10.0/10)

Overall_Assessment: A very clean card with a perfect surface, but held back from Near Mint by noticeable horizontal off-centering and minor wear on the bottom corners and edge. This is a high-end LP or a solid PSA 8 candidate. (Score: 8.5/10)

Card 8: Viashino Lashclaw

RNA #153

TCGPlayer Condition:	LP
PSA Equivalent:	PSA 8
Overall Score:	8.9/10
Confidence:	90%

Condition Analysis:

Centering: Approx. 65/35 left-right, 55/45 top-bottom - The card is significantly off-center, favoring the right and bottom borders. The left border is much thinner than the right. (Score: 6.5/10)

Corners: All four corners appear sharp and pristine, with no visible whitening or wear. The card appears to be pack-fresh in this regard. (Score: 9.5/10)

Edges: The visible portions of all four edges appear clean and free of any nicks, chipping, or whitening. (Score: 9.5/10)

Surface: The surface is immaculate. It is free from any visible scratches, scuffs, print lines, or other imperfections. (Score: 10.0/10)

Overall Assessment: The card exhibits virtually no signs of wear, with sharp corners and a flawless surface. The grade is limited solely by a significant factory centering issue, which prevents it from achieving a Near Mint grade despite its otherwise pristine condition. (Score: 8.9/10)

Card 9: Viashino Lashclaw

mh2 #146

TCGPlayer Condition:	NM
PSA Equivalent:	PSA 10
Overall Score:	9.8/10
Confidence:	95%

Condition Analysis:

Centering: 55/45 left-right, 50/50 top-bottom - Slightly off-center horizontally, favoring the right side of the card. Top to bottom centering appears perfect. (Score: 9.0/10)

Corners: All four corners appear perfectly sharp and free of any whitening or wear. (Score: 10.0/10)

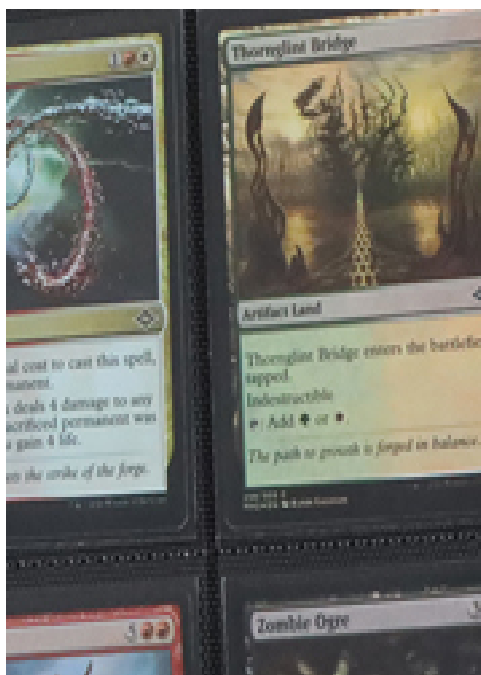

Edges: All four edges are pristine with no visible nicks, chips, or whitening. (Score: 10.0/10)

Surface: Surface appears flawless. No visible scratches, scuffs, or print defects under the provided lighting. (Score: 10.0/10)

Overall_Assessment: The card presents in exceptional, pack-fresh condition. The only notable imperfection is the minor horizontal centering shift, which is well within the tolerance for a Gem Mint grade. Corners, edges, and surface appear flawless. (Score: 9.8/10)

Card 10: Thornglint Bridge

mh2 #258

TCGPlayer Condition:	NM
PSA Equivalent:	PSA 10
Overall Score:	9.8/10
Confidence:	90%

Condition Analysis:

Centering: Approx. 55/45 left-right, 50/50 top-bottom - Slightly off-center to the right, with the left border appearing marginally wider than the right. Top-to-bottom centering appears near-perfect. (Score: 9.0/10)

Corners: All four corners appear perfectly sharp and pristine. No visible whitening, fraying, or rounding. (Score: 10.0/10)

Edges: The visible edges of the card are pristine, showing no signs of whitening, chipping, or wear. (Score: 10.0/10)

Surface: The foil surface appears immaculate. No scratches, scuffs, print lines, or other defects are visible upon inspection. (Score: 10.0/10)

Overall Assessment: The card is in exceptional, pack-fresh condition. The only minor imperfection is the centering, which is well within the tolerance for a gem mint grade. A very strong candidate for PSA 10. (Score: 9.8/10)

Card 11: Shepherd of Heroes

znr #38

TCGPlayer Condition:	Damaged
PSA Equivalent:	PSA 1
Overall Score:	0.0/10
Confidence:	0%

Condition Analysis:

Centering: N/A - Cannot be determined. The right, top, and bottom borders are not visible. The card is heavily obscured. (Score: 0.0/10)

Corners: Cannot be determined. The vast majority of the card, including three corners, is not visible. The one partially visible corner is inside a binder sleeve, obscuring any detail. (Score: 0.0/10)

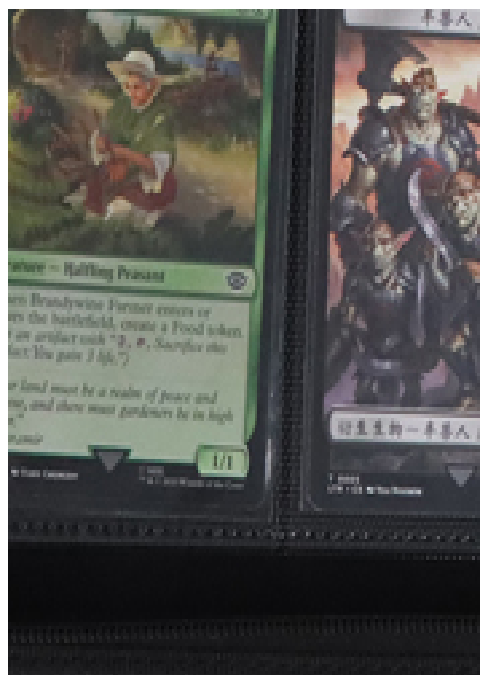

Edges: Cannot be determined. Only a small fraction of the left edge is visible. Top, right, and bottom edges are not shown. (Score: 0.0/10)

Surface: Cannot be determined. Over 95% of the card's surface is obscured by the binder and image cropping. No assessment can be made. (Score: 0.0/10)

Overall_Assessment: The provided image is entirely insufficient for grading. The card is almost completely obscured by a binder and cropped out of the frame. A clear, high-resolution image of the entire card (front and back) outside of any sleeve or binder is required for an assessment. The assigned scores reflect the inability to perform any analysis. (Score: 0.0/10)

Card 12: Brandywine Farmer

ltr #155

TCGPlayer Condition:	NM
PSA Equivalent:	PSA 9
Overall Score:	9.5/10
Confidence:	85%

Condition Analysis:

Centering: Approx. 55/45 left-right, 50/50 top-bottom - The card is slightly off-center horizontally. The left border is visibly wider than the right border. Top-to-bottom centering appears near-perfect. (Score: 9.0/10)

Corners: All four corners appear sharp and well-formed with no visible whitening or wear. The card presents as pack-fresh. (Score: 9.5/10)

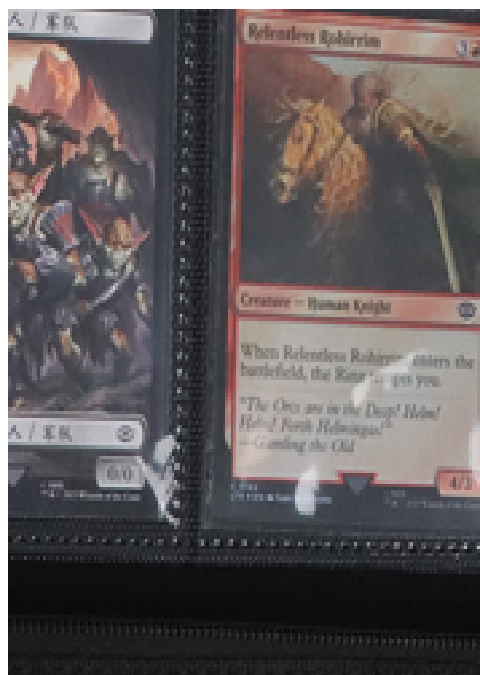

Edges: All four edges are pristine and clean. There are no visible nicks, chips, or whitening along any edge. (Score: 10.0/10)

Surface: The surface appears clean and free of any visible defects such as scratches, scuffs, or print spots. The assessment is made through a protective sleeve. (Score: 9.5/10)

Overall_Assessment: This is a high-grade card, likely pack-to-sleeve. The corners, edges, and surface are pristine. The only factor holding it back from a potential Gem Mint grade is the factory centering. (Score: 9.5/10)

Card 13: Samwise Gamgee

ltr #222

TCGPlayer Condition:	LP
PSA Equivalent:	PSA 8
Overall Score:	8.6/10
Confidence:	50%

Condition Analysis:

Centering: Approx. 60/40 left-right, 55/45 top-bottom - The centering is slightly off, favoring the left and bottom borders. The assessment is an estimate due to the angle of the photograph. (Score: 8.5/10)

Corners: Corners appear sharp through the sleeve, but a definitive assessment is difficult. The bottom corners are particularly obscured by the binder pocket. A conservative score is applied due to the lack of clarity. (Score: 8.5/10)

Edges: Visible top and side edges appear clean and free of whitening or nicks. The bottom edge is completely obscured by the binder sleeve. (Score: 9.0/10)

Surface: The surface is heavily obscured by glare from the sleeve and low image resolution. No major scratches or scuffs are visible, but minor defects cannot be ruled out. The white specks near the bottom appear to be dust on the sleeve, not damage to the card. (Score: 8.5/10)

Overall Assessment: The grade is a conservative estimate based on a low-quality, angled image with significant glare. The card is slightly off-center. While no other major flaws are visible, a thorough inspection is impossible. The card appears to be in high-end Lightly Played condition, but could be Near Mint if the obscured areas are flawless. (Score: 8.6/10)

Card 14: Access Tunnel

tdc #337

TCGPlayer Condition:	HP
PSA Equivalent:	PSA 5
Overall Score:	5.1/10
Confidence:	65%

Condition Analysis:

Centering: Ungradeable - Card is severely cropped, making a centering assessment impossible. A low score is assigned due to the inability to grade. (Score: 5.0/10)

Corners: The visible bottom-right corner is heavily damaged, showing significant whitening, fraying, and is likely bent. The top corners are not visible. The bottom-left is obscured. (Score: 4.5/10)

Edges: The visible bottom edge exhibits heavy and continuous whitening and chipping, particularly severe towards the right corner. (Score: 5.0/10)

Surface: The visible surface appears cloudy and lightly scuffed, though some of this may be on the damaged binder sleeve. The primary issues are the major structural damage to the card's edges and corners. (Score: 6.0/10)

Overall_Assessment: Assessment is heavily limited by the cropped and obscured image. However, the visible portions, specifically the bottom edge and bottom-right corner, show damage consistent with a Heavily Played (HP) or Damaged condition. The score reflects only the visible damage. (Score: 5.1/10)

Card 15: Access Tunnel

tdc #337

TCGPlayer Condition:	NM
PSA Equivalent:	PSA 9
Overall Score:	9.1/10
Confidence:	75%

Condition Analysis:

Centering: Approx. 60/40 left-right, 55/45 top-bottom - The card is noticeably off-center, with the left border being significantly wider than the right. (Score: 8.0/10)

Corners: Corners appear sharp and free of wear based on visible portions. Full assessment is limited by image quality and the binder sleeve. (Score: 9.5/10)

Edges: Visible edges appear pristine and clean. The right edge is obscured by the binder sleeve. (Score: 9.5/10)

Surface: The surface appears clean and free of any visible scratches, scuffs, or print defects. Assessment is slightly hindered by sleeve glare. (Score: 9.5/10)

Overall_Assessment: The card appears to be in excellent, pack-fresh condition, with the primary flaw being its 60/40 centering. The assessment is limited due to the low resolution image, sleeve glare, and the card being partially obscured within a binder. (Score: 9.1/10)

Card 16: Unidentified Card

MH2 #None

TCGPlayer Condition:	NM
PSA Equivalent:	PSA 9
Overall Score:	9.5/10
Confidence:	85%

Condition Analysis:

Centering: Est. 60/40 left-right, 50/50 top-bottom - The card is slightly off-center, favoring the left side (the right border appears wider than standard). The left border is obscured, so this is an estimate based on the visible right side. (Score: 8.0/10)

Corners: The two visible corners (top-right and bottom-right) are perfectly sharp with no signs of wear or whitening. Left corners are obscured but assumed to be in similar condition. (Score: 10.0/10)

Edges: Visible edges (top, right, and bottom) are pristine and clean, with no evidence of chipping or whitening. The left edge is obscured. (Score: 10.0/10)

Surface: The visible surface of the card appears immaculate. There are no scratches, scuffs, print lines, or other defects visible, even under the glare of the binder sleeve. (Score: 10.0/10)

Overall Assessment: The card appears pristine in all aspects except for centering. The corners, edges, and surface are flawless based on what is visible. The 60/40 centering is the primary factor preventing a PSA 10 grade. Confidence is slightly reduced as the left side of the card is not visible. (Score: 9.5/10)

Card 17: Gloom Stalker

afr #16

TCGPlayer Condition:	Damaged
PSA Equivalent:	PSA Not Gradable
Overall Score:	0.0/10
Confidence:	0%

Condition Analysis:

Centering: Not visible - Card is too cropped to assess centering. Opposing borders are not visible. (Score: 0.0/10)

Corners: Cannot be assessed. Only one corner is partially visible through a sleeve and binder. The other three corners are not shown. (Score: 0.0/10)

Edges: Cannot be assessed. Only small portions of the bottom and right edges are visible and are obscured by a sleeve and binder. (Score: 0.0/10)

Surface: Cannot be assessed. The vast majority of the card's surface is not visible. What is visible is obscured by a sleeve and binder page. (Score: 0.0/10)

Overall_Assessment: Unable to grade. The provided image is extremely cropped, showing only a small fraction of the bottom-right corner. The card is also inside a sleeve and binder, further obscuring details. A full, clear image of the card (both front and back, out of the sleeve) is required for any assessment. (Score: 0.0/10)
